The Hawker 400 is a light business jet. Initially designed and built by Mitsubishi, it has been further developed and updated by the Beech Aircraft Company, now part of Textron Aviation. It was produced over 30 years under the names such as Mitsubishi Diamond/Diamond II, Beechjet 400/400A, and Hawker 400XP; military version T-1 Jayhawk was also produced. In total, over 900 Hawker 400s have been delivered. Since 2017, a factory-engineered and supported upgrade to Hawker 400XP is provided, reducing fuel consumption by 16-20%, and improving range by as much as 33%.

The model is executed on technology short run and is intended only for experienced modelers
