# USS 'Coronado' LCS-4

## 美国 LCS-4 濒海战斗舰“科罗拉多”号

### 1/350 SCALE

The USS Coronado is the second Independence Class littoral combat ship to be built by General Dynamics and Bath Iron Works. A contract for the ship was awarded in May 2009 and the ship should be completed by October 2012. It is expected that the ship will be identical to the USS Independence, an all-aluminum tri-maran designed for high speed operations in inshore waters. Payloads can be designed to suit the mission as much of the hull is of modular construction so can be quickly reconfigured to suit requirements. Main missions include mine laying/sweeping, anti-submarine warfare and anti-surface ship warfare. The ships are relatively small with a full load displacement of only 2,750 tons, compared to 10,000 tons for an Arleigh Burke class destroyer. 

Short Story by Philip Greenwood

Die USS CORONADO ist das zweite LCS Schiff der INDEPENDENCE Klasse, gebaut von General Electric und Bath Iron Works. Der Auftrag zur Herstellung erging im May 2009 und die Fertigstellung wird für Oktober 2012 erwartet. Wie die USS INDEPENDENCE (das Typschiff) wird die CORONADO ein Trimaran aus größtenteils Aluminium für Hochgeschwindigkeits Operationen in flachen Gewässern. Die Beladung kann den entsprechenden Missionen angepasst werden. Die modulare Auslegung erlaubt dies in kurzer Zeit. Hauptaufgaben sind Minenlegen/suchen, U-Bootabwehr und die Bekämpfung von Oberflächen Zielen. Die Abmessungen sind 127 m Länge und 30 m Breite. Der Tiefgang beträgt 4,5 m. Die LCS Schiffe sind mit nur ca. 2750 t Wasserverdrängung relativ klein gegenüber z. B. den Zerstörern der ARLEIGH BURKE Klasse.

美国海军“科罗拉多”号是通用动力公司及宝富钢铁公司所承建的第二艘“独立”号级濒海战斗舰。船的合同在2009年5月签定，而该舰应于2012年10月前完成试航交货。在预计中该船基本与首舰“独立”号是相同的，为铝材质三体高速船身设计。船上全是模块化装置，其可因应不同任务之需要而迅速更换该些设备。该船主要功能包括布雷、扫雷、反潜战和反水面作战等。其满载只是2,750吨，相比“伯克”级驱逐舰10,000吨的庞大身躯，其就显得比较娇小了。
