

STARTER

I-16 TYPE 5

1938-1941

1:72

model # CP72025

scale model kit

SPAN: 125,2 mm

LENGTH: 84,5 mm

NUMBER OF PARTS: 102 pcs

- stages of assembly
- variants of assembly
- part number
- fill with putty
- apply decals
- apply the adhesive mask
- bend
- optional
- glue by super glue
- do not glue
- make a hole
- detach with knife
- paint
- repeat the operation N times

Role	Fighter
National origin	Soviet Union
Manufacturer	USSR, Plant No. 21, Plant No. 39, Plant No. 153, Plant No. 458
First flight	30 December 1933 (TsKB-12)
Primary users	Soviet Air Force, Spanish Republican Air Force, Chinese Nationalist Air Force
Produced	November 1934 – 1942
Number built	10,292 (6,848 fighters and 3,444 trainers)

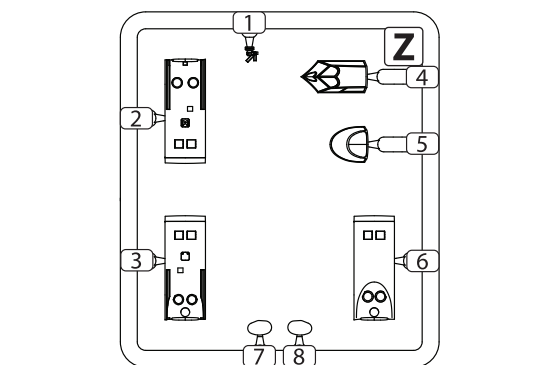

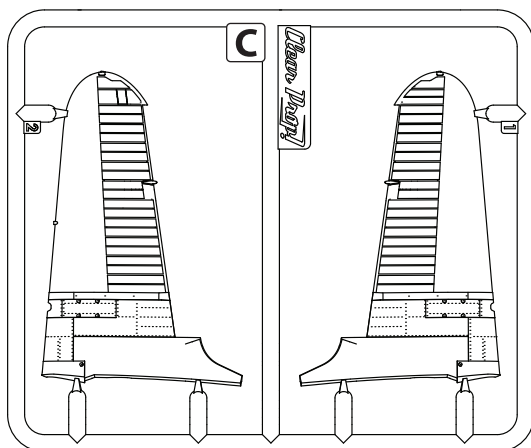

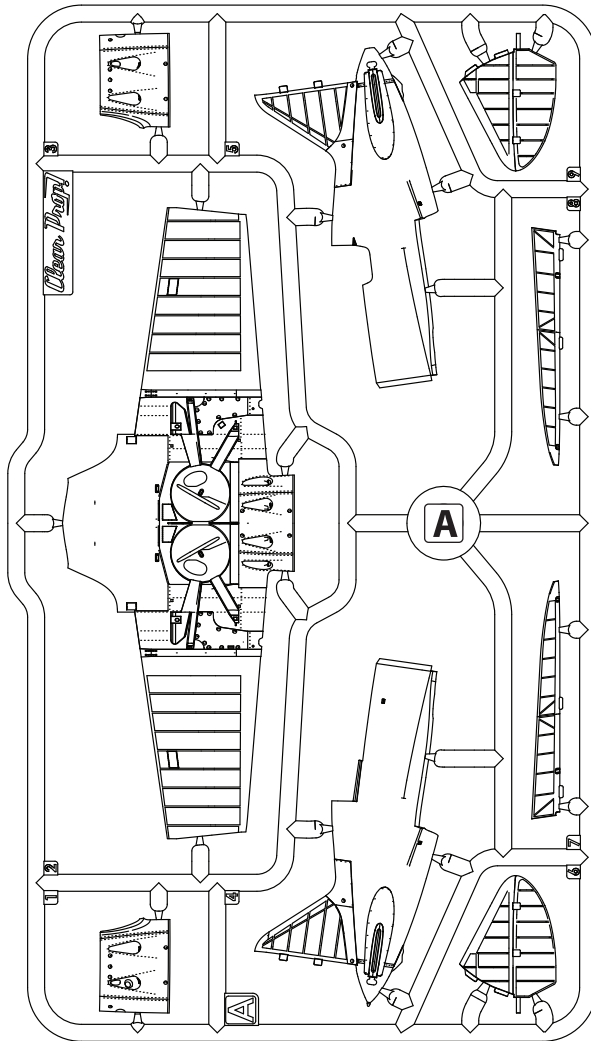

I-16 (TsKB-12) - a Soviet single-engine monoplane fighter of the 1930s, created at the Central Design Bureau by a team led by aircraft designer Nikolai Polikarpov. One of the world's first mass-produced monoplane fighters with retractable landing gear in flight. The aircraft had a mixed design. The serial production of the aircraft, originally with the M-22 engine, started in 1934, and really unfolded only the next year. In 1935, it became possible to install M-25 engines on the aircraft, which were a Soviet copy of the American Wright-Cyclone F-3. The production of these engines was launched at the newly built aircraft factory No.19 in Perm. In 1935, using often American parts, the plant produced 660 M-25 engines. Some of these engines were intended for the I-16. In general, this aircraft was very reminiscent of the third prototype with the Wright-Cyclone F-3. However, the engine cowling has changed somewhat and received frontal blinds, which have become a characteristic feature of this aircraft. At production plant No.21 in Gorky, the aircraft received the designation type 5 and became the most massive single-seat modification of the I-16. Until the end of 1937, more than 2,500 planes were built. I-16 type 5 fought in Spain, China, were widely used at the initial stage of the Second World War
