MAQUETTE A ASSEMBLER \ ÉDITION LIMITÉE
PLASTIC MODEL KITS \ LIMITED EDITION

FR En 1961, la société Marcel Dassault débute l'étude et la construction du Mirage III V-01 dont la particularité est le décollage et l'atterrissage vertical. En reprenant la formule du Dassault Balzac 01, il est équipé de huit réacteurs Royce RB 162-1 en position verticale et d'un Pratt/Snecma TF-106 comme propulsion principale. Le premier décollage vertical (captif) a lieu le 12 Février 1965, puis la première transition vol stationnaire/vol horizontal a lieu le 24 Mars 1966. Les essais se poursuivront 1 an jusqu'à l'abandon du projet. Le prototype du Mirage III V-01 est conservé au Musée de l'air et de l'espace du Bourget.

EN In 1961 Marcel Dassault began the design and development of the Mirage III V 01 vertical take-off and landing fighter aircraft.

The new Mirage had the general layout of the Dassault Balzac 01 prototype aircraft. It was fitted with eight Rolls-Royce RB 162-01 engines mounted vertically and a single Pratt/SNECMA TF-106 turbofan. The aircraft made its first vertical take-off on February 12, 1965 and the first transition from stationary to horizontal flight was made on March 24, 1966. Flying tests were conducted 1 year after they were stopped and the project was completely abandoned. The Mirage III V 01 prototype aircraft is in the Air and Space Museum in Le Bourget.
