modelcollect

ITEM NO.:UA72194

T-72AV is add the Kontakt-1 explosive reactive armour fitted to hull front and turret on T-72A. T-72A is an improved version of the basic T-72 "Ural". Overall, its offensive capabilities are similar to the basic T-72 "Ural", but it is much better protected. The differences between T-72 "Ural" and T-72A include the searchlight being placed on the right hand side of turret, the TPD-2-49 coincidence optical rangefinder being replaced by the TPD-K1 laser rangefinder, added plastic armour track skirts covering the upper part of the suspension with separate panels protecting the sides of the fuel and storage paniers instead of the flipper type armor panels used in T-72 "Ural", the turret front and top being heavily reinforced with composite armour better known by its US codename - "Tolly Pardon", provisions for mounting reactive armor, an electronic fire control system, MP smoke grenade launchers, flipper armour mount & front mud guards, internal changes, and a slight weight increase.
