IAR-80A

UNASSEMBLED PLASTIC MODEL KITS SCALE:1/72

DECALS

TWO VERSIONS OF COLOURING

The IAR-80 fighter was developed by Romanian company IAR Brasov. In April 1939, chief pilot Dumitru Popescu lifted the aircraft up in the air for a first time. Production flight tests took place at the aerodrome in Brasov. Shown performance turned out to be very good and after a number of developments the IAR-80 was put into serial production. The aircraft came in such modifications as IAR-80/A/B/C, IAR-81/A/B/C, differed mostly in engines and armaments. The IAR-80 and IAR-81 fighters had been actively used on the eastern front line until the summer of 1943. After that all aircrafts were transferred in Romania for the state petroleum complex defense.

The model is executed on technology short run and is intended only for experienced modelers.
