POLA

INTERCHANGABLE AT ANY TIME IF NO GLUE IS USED

Harald Bauske ~ CEO
 As the owner and managing director of Modellbau König, Germany, Harald assembled a team of creative professionals and provide the budgets to pursue on of his dreams: releasing his own scuba diving subjects as plastic models kit under his own brand. Back in 1999, when he made the first steps with his company, he did not imagine that this dream would ever become a reality. Harald is very proud and happy that the models from Das Werk not only appeal to him but also that so many other model makers have fun with the kits

Pete Hamann ~ 3D designer, CAD modeler, Graphic Design
 Born and raised in California, Pete worked on his design chops as an aerospace designer in Seattle, Washington, before packing up and relocating to Spain. He developed a deep interest in flying machines while growing up next to military air bases in Southern California. After spending a few years as a machinist, making other people's designs a reality, he obtained a bachelor of arts degree in industrial design from The Academy of Art in San Francisco, California.
 Pete can be reached at Peterjhamann@gmail.com

Felipe Rodna ~ Box art
 Born in 1976, Felipe lives with his wife and two children in Salamanca, Spain, where he works as an architect and digital artist. He combines his experience in 3D digital art with his passion for modelling in his illustrations, where he always strives to achieve a balance between technical detail and craft. His illustration credits include books for Osprey publishing, Panzerwrecks, Peko publishing, Canfora Publishing, Tankograd, and the Spanish magazine Despeta Ferro.
 Felipe can be reached at feliperodna@hotmail.com

Neil Richmond ~ Mixed Gas Closed Circuit Rebreather Diver and Instructor, Underwater videographer and Diving Expedition Leader. Neil had been diving for almost 30 years, and been instructing at all levels for the last 20 years, sharing his skills to allow others to access the more adventurous and technically demanding dive sites that are his passion. Neil has spent much of his spare time locating and diving historic offshore wrecks from both his own RIB "EQUINOX" and local charter boats. His use of closed circuit rebreather technology allows much longer and deeper exploratory and survey dives to be safely conducted. Neil can be reached at neil_m_richmond@icloud.com

James Hartley ~ Commercial Skipper, Wreck and Cave Diver, Vice Chairman of Berwickshire Marine Reserve
 Born in Yorkshire, UK, James had a background in construction survey and management. 15 years ago he discovered Scuba diving. Once he began wreck diving and discovered the amount of history buried under the waves around the UK he was hooked. He's dived 10 Submarines around the UK, five U-boats and was involved in a ministry of defence survey of UC-39 off his native Yorkshire coast.

Das Werk and Hamann Studios would also like to thank the following people for their contribution to this project:

- Bernhard Wenzel
- Paul Webster ~ Underwater Photographer (paul@paul-webster.co.uk)
- Carlos Elias Llop
