Scania S730 Hightline 4x2

EN

Scania S series - a key player in the industrial and heavy commercial vehicles market - has been designed to meet long-range logistics and transportation needs. The new S series was introduced by the famous Scandinavian manufacturer to the market in 2016, and included new innovative design solutions. Key design features were incorporated to optimize the use of the space inside the cabin to enhance driver comfort, and greater attention was afforded to more modern 'active and passive' safety systems to aid driver control and overall vehicle management. The attractive and contemporary new design also reflected the modern aerodynamics of the vehicle and its reduced fuel consumption targets. Important "success factors" of this particular Scania design lie within its operational efficiency, lower fuel consumption and environmental credentials. The "Highline" version with the larger cabin, further echoes the aims of the "S" line series to meet long-distance transport and logistics commitments.

IT

La serie S di Scania costituisce uno punto di riferimento sul mercato dei veicoli commerciali ed industriali pesanti destinati a soddisfare i bisogni della logistica e dei trasporti di lungo raggio. La nuova serie S venne introdotta dal celebre produttore Scandinavo sul mercato nella seconda metà dell'ultimo decennio adottando soluzioni progettuali innovative. Il nuovo progetto venne infatti realizzato per ottimizzare l'impiego degli spazi interni alla cabina ed esaltare il comfort del conducente. Grande attenzione alla sicurezza attiva e passiva attraverso l'adozione dei più moderni sistemi di controllo e di assistenza alla guida. Il nuovo design, accattivante e moderno, è stato realizzato anche per tenere in considerazione l'aerodinamica del veicolo e la riduzione del consumo di carburante. Un'importante "fattore di successo" della motrice Scania è infatti l'efficienza operativa, la minimizzazione dei consumi e l'attenzione alle emissioni. La versione "Highline" con la cabina maggiorata amplifica ulteriormente la vocazione della linea "S" all'adempimento degli impegni di trasporto e logistica sulle lunghe distanze.

DE

Die S-Serie von Scania ist ein Maßstab auf dem Markt für schwere Nutz- und Industriefahrzeuge, die für die Anforderungen von Logistik und Fernverkehr konzipiert sind. Die neue S-Serie wurde von dem berühmten skandinavischen Hersteller in der zweiten Hälfte des letzten Jahrzehnts mit innovativen Designlösungen auf den Markt gebracht. Tatsächlich wurde das neue Design entwickelt, um die Raumnutzung im Fahrerhaus zu optimieren und den Fahrerkomfort zu erhöhen. Durch modernste Steuerungs- und Fahrerassistenzsysteme wird der aktiven und passiven Sicherheit große Bedeutung beigemessen. Außerdem wurde das neue, attraktive und moderne Design auch im Hinblick auf die Aerodynamik des Fahrzeugs und die Reduzierung des Kraftstoffverbrauchs entwickelt. Ein wichtiger „Erfolgsfaktor“ für die Sattelzugmaschinen von Scania ist die Einsatzbereitschaft, die Minimierung des Kraftstoffverbrauchs und die Reduzierung der Emissionen. Die Version „Highline“ mit dem vergrößerten Fahrerhaus macht die „S“-Linie noch attraktiver für den Einsatz im Fernverkehr und in der Logistik.

FR

La série S de Scania constitue une référence sur le marché des véhicules commerciaux et industriels lourds destinés à satisfaire les besoins de la logistique et des transports long distance. La nouvelle série S fut mise sur le marché par le célèbre producteur scandinave lors de la seconde moitié de la décennie passée, en adoptant des solutions de conception innovantes. En effet, le nouveau projet fut réalisé pour optimiser l'utilisation des espaces intérieurs de la cabine et améliorer le confort du conducteur. Une grande attention fut accordée à la sécurité active et passive, à travers l'adoption des systèmes les plus modernes de contrôle et d'aide à la conduite. Le nouveau design, séduisant et moderne, a aussi été réalisé en tenant compte de l'aérodynamique du véhicule et de la réduction de la consommation de carburant. L'un des « facteurs de succès » du tracteur Scania est en effet son efficacité de fonctionnement, la minimisation des consommations et l'attention accordée aux émissions. La version « Highline » à cabine majorée accroît encore la vocation de la ligne « S » à accomplir les tâches de transport et logistique sur de longues distances.

ES

La serie S de Scania es un referente en el mercado de los vehículos comerciales e industriales pesados diseñados para satisfacer las exigencias de la logística y el transporte de larga distancia. La nueva serie S fue introducida en el mercado por el famoso fabricante escandinavo en la segunda mitad de la última década mediante la adopción de soluciones de diseño innovadoras. De hecho, el nuevo diseño fue creado para optimizar el uso de los espacios internos de la cabina y mejorar la comodidad del conductor. Y una gran atención a la seguridad activa y pasiva mediante la adopción de los más modernos sistemas de control y asistencia a la conducción. El nuevo diseño, atractivo y moderno, se realizó también teniendo en cuenta la aerodinámica del vehículo y la reducción del consumo de combustible. Un «factor de éxito» importante del motor Scania es, de hecho, la eficiencia operativa, la minimización del consumo y la atención a las emisiones. La versión «Highline», con la cabina más grande, amplifica aún más la vocación de la línea «S» para cumplir con los compromisos de transporte y logística de larga distancia.

RU

Серия S компании Scania является эталоном на рынке тяжелых коммерческих и промышленных автомобилей, разработанных для удовлетворения потребностей логистики и магистральных перевозок. Известный скандинавский производитель ввел на рынок новую серию S во второй половине прошлого десятилетия, взяв за основу ультрасовременные дизайнерские решения. Новый дизайн был разработан для оптимизации использования пространства внутри кабины и для повышения комфорта водителя. Большое внимание уделяется активной и пассивной безопасности благодаря внедрению самых современных систем управления и помощи водителю. Новый дизайн, привлекательный и современный, был также выполнен с учетом аэродинамики автомобиля и снижения расхода топлива. Важными «факторами успеха» тягачей Scania является эксплуатационная эффективность, минимальное потребление топлива и внимание к экологии. Версия «Highline» с увеличенной кабиной еще больше подчеркивает предназначение линии «S» для выполнения транспортных и логистических задач на дальних расстояниях.

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie occorrenti dal foglio, immergerle in un bicchiere di acqua pulita per circa 20", metterle in posizione sul modello e farle scivolare dalla carta: per una migliore aderenza comprimerle con una pezzuola pulita.

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 20"; position the decals on the kit, letting them slide from the paper. For a better adesion, press them by means of a clean rag.

Påläggning av decaler: klipp ut den decal som skall användas och doppa den i ett glas vatten under en 20". Sätt decalen på plats på modellen och låt den sakta glida av pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Anbringung: Die benötigten Abziehbilder vom Blatt abschneiden, in ein Glas reines Wasser für etwa 20" eintauchen, auf das Modell legen und dann vom Papierbogen abheben. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem reinen Tuch andrücken.

Instruction pour l'application des décalcomanies. Couper les décalcomanies choisies et les plonger environ 20" dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

Istrucciones Para la aplicación de las calcomanías: cortar las requeridas, sumergirlas en un recipiente de agua limpia durante 20", colocar las calcomanías sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapio limpio.

Transfers: knip het benodigde deel uit, dempel et ca. 20" onder water, oud het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.

デカール使用法 台紙から、それぞれのマークを切り取ります。ゆるま湯に20秒くらいつけて、引剥します。マークをすべらすようにして台紙からとり、指定の位置にはってください。かわらかな布でマークを押しつけて気泡を取ってください。マーク面には、かわくまで手をふれないでください。

Указания по применению декалей: Отрежьте нужную вам часть декали от общего листа, поместите ее на 20 минут в чистую воду, затем, выбрав необходимое место на модели, переведите туда изображение, сдвинув его с бумажной основы. Для лучшего прилегания промажьте декаль чистой тряпочкой.
